

Checking

File permission tiers:

1. owner
2. group
3. other users

```
ls -l
```

```
james@laptop:~/Downloads/temp$ ls -l
total 8
-rw-rw-r-- 2 james james 4 Jul 22 16:51 afile.txt
-rw-rw-r-- 2 james james 4 Jul 22 16:51 hlink_afile
```

owner james -rw

group james

Changing

only root user can change a files owner and groups

ordinary users can change files they own

chown

change owner

```
chown [options] [new-owner][:new-group] filenames
```

example

```
chown sally:skyhook document.txt
```

changes user to *sally*

changes group to *skyhook*

```
R --recursive
```

change ownership on entire directory tree

chgrp

change group

```
chgrp [options] newgroup filenames
```
